J113589-1 UDS Level 2 Report Prelim Report.pdf

Brian, here is the preliminary data for the well samples (and 1 spring sample). Not seeing anything of concern here, and nothing indicating any impact from the site. The key for the sample locations is below.

I got your message about disposal facilities. I don't know of any that we haven't already talked about, but Weston and I will make some calls tomorrow morning and see if we can come up with some other possibilities.

Subject: preliminary data

Greg,

Attached is an updated version of the preliminary data report which includes results for all analyses. As we discussed, there were a couple nitrate detection slightly over 8ppm. Other than that, my quick review of the data seems to indicate most analytes within typical background ranges.

Call me tonight if you are looking over and have any questions or want to discuss. We'll get working on some preliminary summary tables asap.

Thanks,
